

The Skin Line Speaker Column

*Tripod, speaker, cables, and cords not included

Description:

- Sold individually, not in pairs, a 3-sided “pipe and tension fabric” façade to hide speaker and speaker stand

Color:

- Black

Set-up Time:

- 5-minutes each (5:00)

Read More:

- The column is covered with Lycra fabric (a.k.a. Spandex) that does not affect the sound. If you remember, consumer speakers use fabric grills! Pro speakers use metal or plastic grills for durability issues.
- The open rear provides easy access and comfortable air flow for powered speakers
- Cables, cords, speakers, and tripods are tastefully hidden from view
- Covers up scratches, dents, old beat-up equipment, metal and chrome tubing, to improve its appearance for a high-end professional look
- For mobile DJ setups, it looks absolutely stunning when paired with the Mobile ProBooth
- PA style sound systems can be completely hidden - tastefully
- Dimensions are 7-feet, 7-inches high x 43 inches x 43 inches – large enough to accommodate standard sized speaker stands with speakers raised high, or setups using stacked speakers
- Easy setup, tear down, and transport
- Quick-connect pipe frame is strong and stable
- Frame assembles quickly on the floor. Fabric fits over the pipe frame and hides piping for a wrinkle free look.
- The fabric goes on each of the four corners like a fitted bed-sheet. Each side has a simple pocket for the frame to slide into.
- In the front, two Velcro-style straps keep fabric flat and taut. The white strap is front center on the top white pipe, the black strap is front center along the bottom black pipe
- Once assembled it's light and easy to stand up, and slide wherever you like
- Total blackout material – speaker and tripod are well hidden from view
- Other fabric colors (stock or custom) are available as replacement parts to cost effectively “change the look”

- For easy tear down, fabric may be folded or rolled up until next use
- Free carry bag included and measures 49 inches x 18 inches x 7 inches
- Weight is 36 pounds in the bag

Very Important:

- No brand of Lycra or Spandex is fire retardant unless treated with a special spray application
- Any brand of Lycra products that might be fire retardant will stay FR only until washed
- Our The Skin Line Speaker Column is made of fire retardant Lycra (a.k.a. Spandex)
- All non-Lycra DJ Skirts/Glow Skirts products are fire retardant and do not ever wash out!

Material Specs:

- Industrial gloss plastic piping
- This piping type is also used for hockey goals, soccer goals, and patio furniture
- Lightweight, strong pipe is 1/3 the weight of aluminum

Fabric Information:

- Tension style fabric is virtually wrinkle free
- Lycra
- If washed, wash in cold water gentle cycle, tumble dry on low heat
- Passes NFPA 701 (FIRE CODE TEST) until washed
- *More info at DJSkirts.com nav menu under "Fabric Information"*
